## Building and Sustaining Learning Organizations for the 21st Century Thursday, September 13, 2007 Obstacles & Solutions

| How do you change staff members who do not   |   |
|--|---|
| see the need to change?  |   |
|  | pink slips  |
|  | build relatioinships  |
|  | create critical mass of believers by building shared  |
|  | knowledge   |
|  | minimize the impact of the resistorsfocus on the positives  |
|  | don't give up on themsell it to a few who influence the others  |
|  | build capacity thru shared decision-maiking, learning communities, etc., highlight examples of desired behaviors                                  |
|  | focus on the best teachers, but hold everryone accountable  |
|  | show the relevance of the change  |
| How do we convince teachers to embed rigor   |   |
| and relevance while mastering core content?  |   |
| 5  | build shared knowledge around rigor & relevance   |
|  | look at other schools to see that it is working   |
|  | show individual successes in our own district in  |
|  | classrooms implementing rigor & relevance   |
|  | practice  |
|  | professional learning communities   |
|  | e-walks that make rigor & relevance a priority  |
|  | develop leadership within staff to model it   |
| How can we integrate this work into our<br>existing initiatives without it being viewed as an<br>"add-on"? |   |
| add on :   | provide planning time   |
|  | demonstrate how this is part of the   |
|  | instructional/assessment planning and implementing  |
|  | what is already happening   |
|  | use an instructional leadership team to develop and   |
|  | implement lessons   |
|  | don't call it an "initiative" just have intentional and thoughtful dialogue with principals. Make administrator meetings also be a PD opportunity |
|  | if you add something take something off   |
|  | quadrant d activities students to do more, not the teachers   |
|  |   |
| Obstacles: attitude, staff; time, planning quadrant d activities   |   |

|   | leadership team - create ahah's                                      |
|---|--|
|   | reward/recognize staff for attitude/shift                            |
|   | make good hiring a priority  |
|   | re-examine schedule to creat common planning - explore               |
|   | other options (i.e., early dismissal)                                |
|   | early release days for job embedded pd                               |
|   | read book - fred factor (attitude)                                   |
|   | change your paradigm   |
|   | needs assessment for staff   |
|   |  |
| Need to change culture in some schools. Need  |  |
| to creat a sense of urgency even though   |  |
| assessment results are adequate   |  |
|   | focus on relationships - culture                                     |
|   | turn up the HEAT - 21st CENTURY SKILLS                               |
|   | focus on short term formative assessments identifying                |
|   | needs/weakness   |
|   | make having a positive culture a top priority; know all              |
|   | your students and staff  |
|   | focus on success instead of failure                                  |
|   | empower teachers by building leadership capacity                     |
|   |  |
|   | focus more on relationships, a little less on accountability         |
|   | show the need for change to all stakeholders                         |
|   | act on school culture audit  |
|   |  |
| Teacher buy-in to best practices instructions   |  |
|   | communication to principals  |
|   | begin by having all administrative staff lead by example             |
|   | (regarding relationships)  |
|   | small intervals (steps)  |
|   | build leadership potential within staff (teachers teaching           |
|   | teachers) (capitalize on expertise)                                  |
|   | establish trust  |
|   | model "best practices" in trainings                                  |
|   | show the need for change   |
|   | peer observatioins/showcase best practices                           |
|   | peer observationis/snowease best practices                           |
| Lack of a common understanding of rigor & relevance which inhibits high expectations for all students |  |
|   | provide pd by someone who has success in school                      |
|   | find consistent time to teach teachers (early release)               |
|   | common discussion time with all stakeholders                         |
|   | pd, time and practice  |
|   | establish common definitions of rigor & relevance                    |
|   | consistent modeling (from top down) of all of above                  |
|   | re-teach the teachers  |
|   |  |
|   | set expectations by administration through budgeting job embedded pd |
|   |  |

| I love do veo obtoio viscos 9 volovenos persos the | 1  |
|--|--|
| How do we obtain rigor & relevance across the      |  |
| breadth of core content 4.1?                       |  |
|  | begin by focusing on the "big ideas"                                       |
|  | take baby steps  |
|  | take 4.1 lessons and collaborate   |
|  | show examples of quadrant d lessons using 4.1 core                         |
|  | content/prioritize standards   |
|  | collaboratively plan according to DOK levels                               |
|  | analyze assessment (student classroom)                                     |
|  | focus on pre-assessment  |
|  | change instruction based on results of common                              |
|  | assessments  |
|  |  |
| Teachers perceive that the quantity of content     |  |
| precludes them from embeding relevancy and         |  |
| depth in curriculum                                |  |
| aopar in odinodidin                                | unwrap standards - team planning   |
|  | thematic approach  |
|  | change perceptions through dialogue and examples                           |
|  |  |
|  | Let teachers see sample lessons or projects. Prioritize content            |
|  |  |
|  | revisit interdisciplinary units  |
|  | develop power standards - "cut to the chase"                               |
|  | focus on pre-assessment  |
|  |  |
|  | develop curriculum units which reflect rigor & relevance                   |
|  | prioritize content - DOK   |
|  | focus on the DOK   |
|  | build shared knowledge of rrr/21st century skills                          |
|  |  |
|  |  |
| How do we change culture in a supportive way       | ,  |
|  | lead by example, involve stakeholders (bottom-up);                         |
|  | provide time/opportunities for change                                      |
|  | work on relationships at all levels  |
| V  | value all  |
|  | professional learning teams  |
|  | celebrate success  |
|  | walk the walk  |
|  | fish philosophy  |
|  | reinforce positives already in place                                       |
|  | school culture surveys   |
|  | fred factor  |
|  | brag on staff successes  |
|  | Drag on stail successes  |
| Clear consensus and calibration of desired         |  |
|  |  |
| outcomes - what does quality teaching look         |  |
| like?  | and the and complete an annual state of the Principles                     |
|  | practice and come to an agreement about quality                            |
|  | teaching - common language use faculty meetings for instructional purposes |
|  |  |

|   | use vides aline and discuss (professional learning  |
|---|---|
|   | use video clips and discuss (professional learning  |
|   | communities)  |
|   | walk-thrus, coaching, modeling, visiting successful/model   |
|   | schools   |
|   | same school grade/content observe master teacher  |
|   | ask students - they will tell you   |
|   | thoughtful educ   |
| Deffice to a least to be live a flag and to                       |   |
| Getting teachers to believe they can do                           |   |
| quadrant d while doing standards too;                             |   |
| use/discover available resources; time to                         |   |
| think/plan; emphasis on assessment                                |   |
| accountability  | all, the man (A)  |
|   | walk-thrus (4)  |
|   | common/collaborative planning (1)   |
|   | marco polo (2)  |
|   | reflection time during faculty meetings (3)   |
|   | observe modeled lessons in quadrant d (1)   |
|   | promethean planes (2)   |
|   | build shared understanding of rrr/21st  |
|   | create quad d lessons as a team   |
|   | realize how DOK will result in higher test scores   |
|   | build shared understanding of value of rrr & 21st century skills analyze assessment date conduct and analyze student surveys to reveal gaps between student/teacher perceptions "good to great" issue |
|   | personalized/differentiated instruction - g/t students build relationships with students  |
|   | give support to new teachers  |
|   | what do the students deserve?   |
|   | try one new idea at a time  |
|   | ary one new idea at a time  |
| ı   | show that the bar is continuously increasing, and so must   |
|   | we - use examples such as having to renorm tests  |
|   | •   |
|   | we - use examples such as having to renorm tests  |
| How do we get teacher buy-in amid current                         | we - use examples such as having to renorm tests  |
| How do we get teacher buy-in amid current accountability demands? | we - use examples such as having to renorm tests compare to the best  |
| How do we get teacher buy-in amid current accountability demands? | we - use examples such as having to renorm tests compare to the best data doesn't lie   |
| How do we get teacher buy-in amid current accountability demands? | we - use examples such as having to renorm tests compare to the best  data doesn't lie show/teach the value of rr & 21st skills   |
| How do we get teacher buy-in amid current accountability demands? | we - use examples such as having to renorm tests compare to the best data doesn't lie   |

| Buy-in from teachers (r&r) & teaching kids not |  |
|--|--|
| just content; special needs                    |  |
|  | administrators must lead by example                        |
|  | pd on rigor/relevance - must have a complete               |
|  | understanding of r/r                                       |
|  | relationship building                                      |
|  | modeling by master teachers                                |
|  | high expectations for ALL students                         |
|  | build community of learners that fosters shared            |
|  | responsibility   |
|  | collaboration between special & regular ed                 |
|  | positively reinforce (celebrate, recognize) risk-taking by |
|  | teachers and students                                      |
|  | teachers must understand the importance and that can       |
|  | be done through their success                              |
|  | develop home visit strategy                                |
